Health R & I in Norway

- Policies, Strategies, Instruments, Outcomes

Hjørdis M. Sandborg,

Kristin Andersen,

SC1 - Health, demographic change and well-being, May 18, 2017

The sectoral principle in research

The Ministry of Education and Research (MER)

- strategic research policy both domestic and internationally.
- responsible for funding basic research

Responsibilities for the sectoral ministries – MOH

- Supports research and skills development in the health sector
- Supports quality and relevance in health research
- Supports international research collaboration in the health sector

The sectoral principle in R&I

	Education and Research	Trade, Industries and Fisheries	Health and Care services
Aim	-Excellence in research	-Industrial development	-Quality and relevance in research for higher quality in the services, -close knowledge gaps
Funding	-Basic research	-Innovation and Commercialisation	-Applied research
Tools 	-Bottom up programs -Research infrastructures in RCN -Universities , University colleges, Institutes	-User-driven innovation programmes in RCN -Co-funded by private sector 	-Health research programmes in RCN -Earmarked funding in the Regional health authorities (Hospital sector)

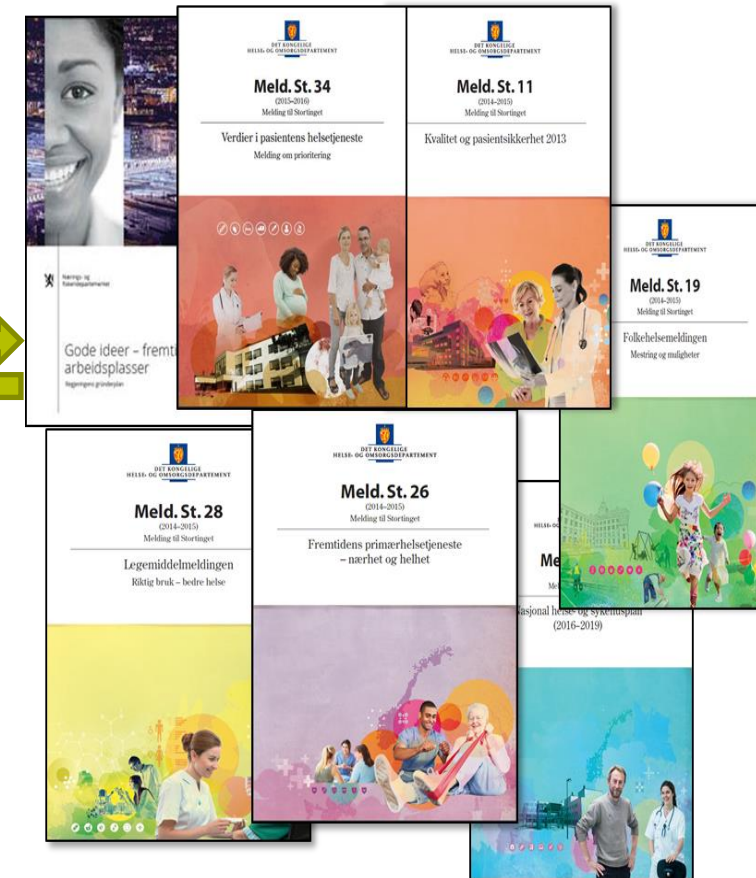

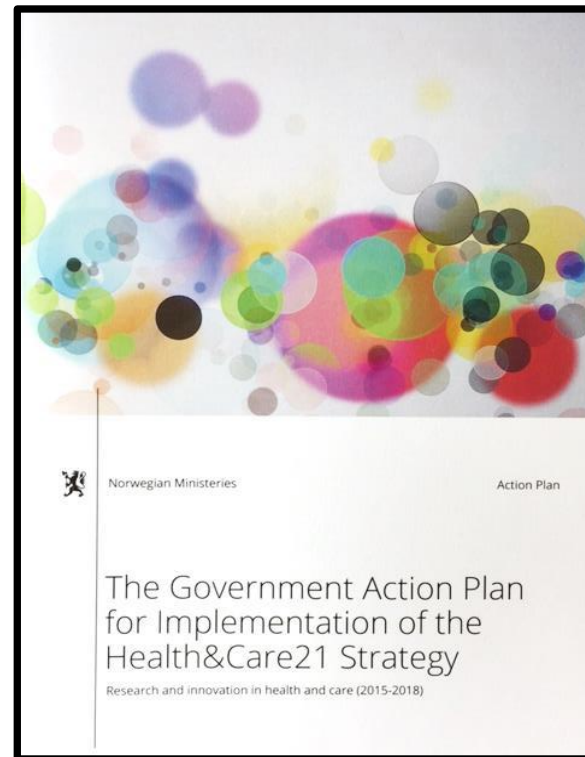

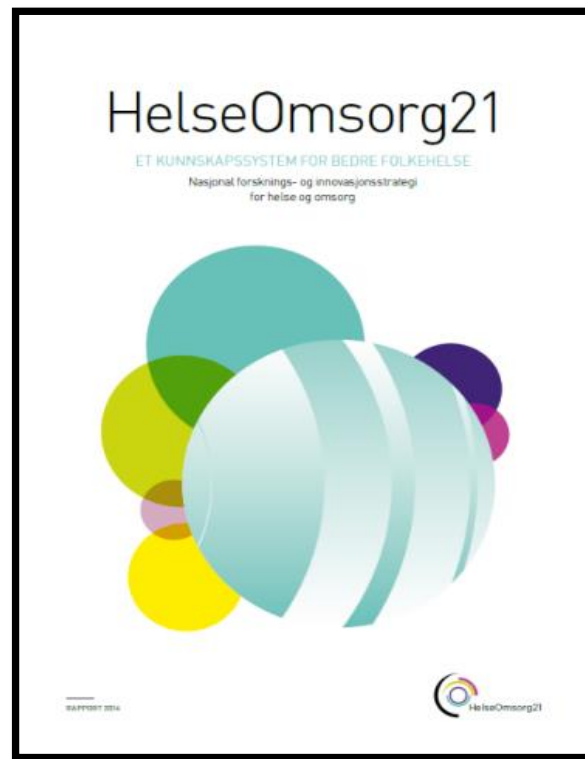

Policies – The longterm plan for research and higher education

- Strengthens Norway's competitiveness and innovation capacity
- Solves the Societal Challenges
- Supports Excellent Science

HealthCare21-strategy – government action plan

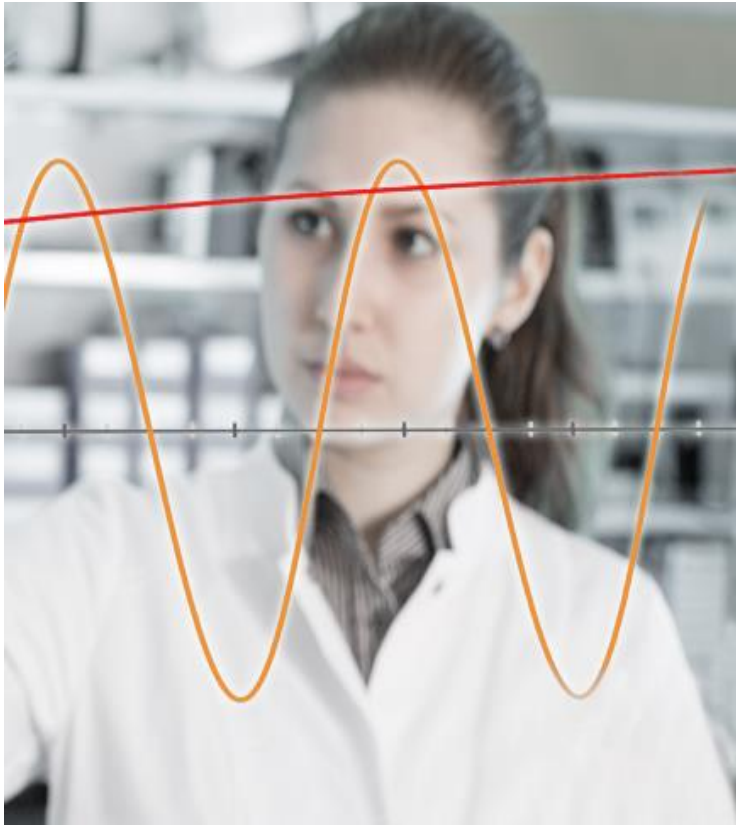

HealthCare21-strategy: main priorities

- 1. Knowledge mobilisation for the municipalities.**
- 2. Health care as a focus area of industrial policy.**
- 3. Easier access to, and increased utilisation of health data.**
- 4. An evidence-informed health and care system based on user involvement and competence.**
- 5. A strong commitment to internationalisation and increased participation in the competitive European research system**

HealthCare21-monitor

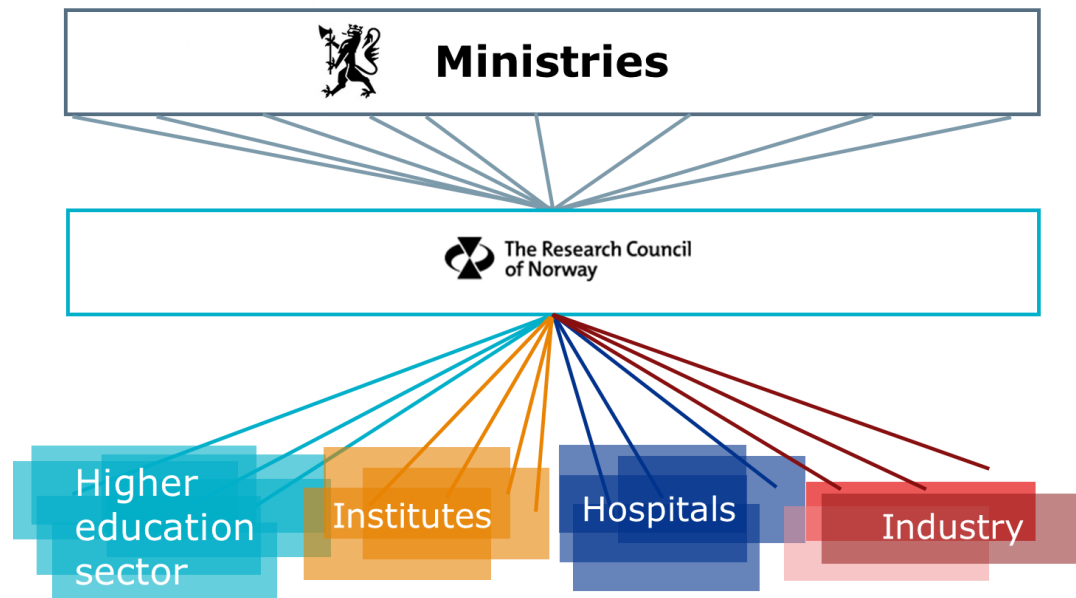

Knowledge base for resource use, results, and effects of R&I in health and care

- Indicators which include all priority areas of the HealthCare21-strategy,
- Use of the Health Research Classification System (HRCS).
- Become an important governance instrument for the Ministry, public funding agencies and the research community

The Research Council of Norway (RCN)

-One funding agency for all areas and sectors

- Adviser to all 15 Ministries
- Networking and dissemination
- Research facilitator
- Internationalization

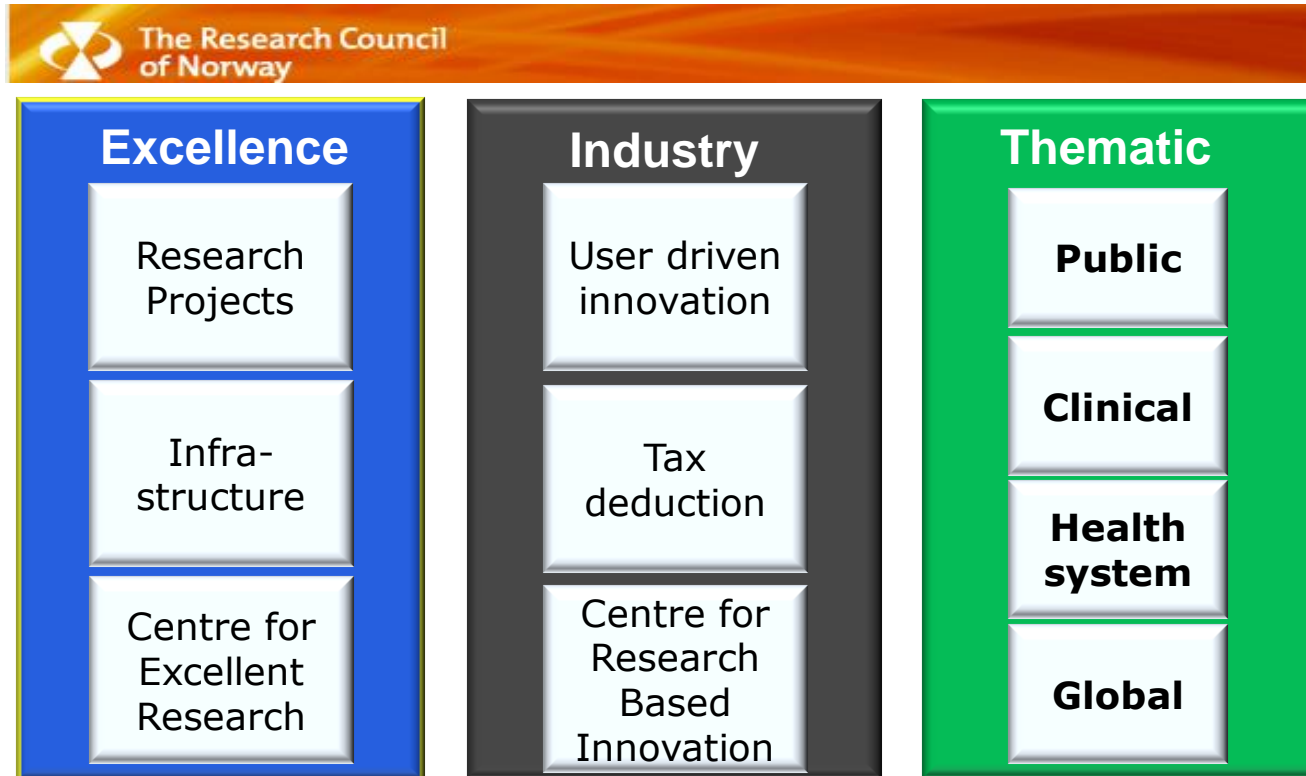

The Research Council of Norway (RCN)
